ELKO EP

We are traditional, innovative and purely Czech development manufacturer of electronic devices and we have been your partner in the field of electroinstallations for 27 years.

ELKO EP employs about 330 people, exports its products to more than seventy countries, and has representatives in fifteen foreign branches. Company of the Year of the Zlín Region, Visionary of the Year, Global Exporter of the Year, Participation in the Czech TOP 100, these are just some of the awards received. Still, we are not finished. We are constantly striving to move forward in the field of innovation and development. That's our primary concern.

Millions of relays, thousands of satisfied customers, hundreds of our own employees, twenty seven years of research, development and production, fifteen foreign branches, one company. ELKO EP, innovative- a purely Czech company based in Holešov, where development, production, logistics, service and support go hand in hand. We primarily focus on developing and manufacturing systems for building automation in the residential, commercial and industrial sector, a wide range of Smart city facilities and the so-called Internet of Things (IoT).

WE ARE

DEVELOPERS

In the new R&D center, more than 30 engineers develop new products and extend the functionality of existing products.

PRODUCERS

Modern antistatic spaces, 2x fully automated SMD production lines, 2 shift operations.

SUPPORT

24 hours / 7 days / 360 days we not only provide technical support but also logistics.

SELLERS

Personal access to more than 70 sales representatives in ELKO EP Holding provides impeccable services and superior products at an affordable price.

Timers/Relays

Time relays, auxiliary relays, installation contactors, Bistable relays, stair controllers, timers, dimmers, power supplies, control and signalling devices.

Protection and monitoring relays

Voltage relays 1-phase and 3-phase (under voltage, overvoltage, phase failure, phase asymmetry, phase sequence), current relays, power factor and frequency monitoring, thermostats, level relays.

Wireless electro-installation iNELS RF

Components of smart wireless wiring can be easily and quickly used in existing buildings where it is not desirable to cut holes for cables (e.g. add / change a light switch when changing room layouts). However, it is also possible to assemble a complete system for apartment or house control, intelligent control of heating, blinds or scene settings. When using the eLAN-RF gateway, the entire installation can also be controlled by an application from a mobile phone, tablet or television.

Hotel Wireless Retrofit (HRESK)

Hotel Room Energy Saving Kit - is a complete solution designed primarily for existing hotel rooms and is based on the iNELS RF wireless system. It focuses on the following areas: "Energy savings": switching off all appliances when leaving the room or not overheating / not overcooling, "Comfort" - all out of bed and "Safety": bell, guest in the room, maid, visitor.

Wired electro-installation iNELS BUS

The sensors and actuators, together with the central unit, which is the heart of the system, communicate via a 2-wire bus and enable the construction of a larger installation for family houses, villas, hotels and buildings. Individual functions of elements are parameterized in SW iDM, so simple and more complex actions can be set.

Hospitality Hotel (GRMS)

Guest Room Management System – is a comprehensive solution designed primarily for new hotels, guesthouses or wellness and is based on the iNELS BUS system. In the room, it resolves the control of lighting, access, temperature control and audio / video distribution. It features glass panels with touch buttons that can be combined in various ways (numbers, shape, and colours) and customized (description, logo).

Building management system

Building Management System is the superstructure above the iNELS BUS, resp. wireless system iNELS RF. It enables not only the control of several central units (CU) or gateway (eLAN), but also the connection to other protocols that the technology brings in the building (Modbus, Bacnet, KNX, etc.).

Lighting control

ELKO EP products offer a variety of lighting control solutions for all types of light sources: from simple (dimmers from the RELAY section), through wireless (iNELS RF) to sophisticated control within the iNELS BUS installation, which (except conventional RLC-LED dimmers) also includes units for light control via DALI and DMX bus.

Switches and sockets

Switches, sockets and a complete range of devices and accessories - this is the Logus90 series from the Portuguese manufacturer Efael. This range is complemented by both standard plastic frames and luxury frames made of purely natural materials: real wood, metal, granite or tempered glass. Be exceptional!

As when we painted our future housing on paper with crayons when we were young, the LARA configurator allows us to indulge in this hobby to this day. Do you like timeless design of frames made of natural materials? Would you like glass switches and controls? Do not you know if they'll be in tune with the colour of your walls? Will they fit comfortably into a given area?

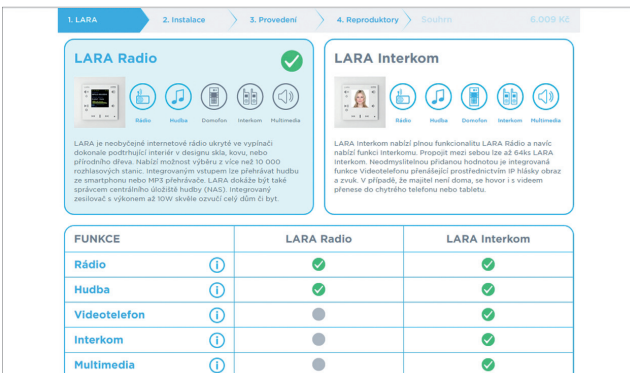

Try the LARA configurator online. You can choose from one single frame to five frames. Combine the features that will keep you entertained!

Just 4 steps in the configurator:

At each step of the configurator, you choose, for example, the installation method, the size or design of the frame (e.g. glass, wood, metal), the wall colour/type and the type of speakers (wall, ceiling, ...). The result delivers an overview and estimated total cost. You can place the order here directly or send it by email.

CG - Cristal/Ice CP - Cristal/Pearl CA - Cristal/Aluminium CS - Cristal/Gray

EC - Glass - black/Pearl EG - Glass - black/Ice EA - Glass - black/Aluminium ES - Glass - black/Gray EP - Glass - black/Black

METALLO

Distinct and modern feel. The refinement and brightness of metal enhance the value of the surroundings, and lend inspiration to great moments.

Dimensions: 94 x 94 mm

TP - Titanium/Pearl IA - Inox/Aluminium OP - Gold/Pearl QS - Nickel/Gray US - Aluminium/Gray RS - Chrome/Gray OU - Gold/Gold

ARBORE

Selection of natural materials. Warm shades of wood with their varying structures create a room full of happiness and sincere comfort.

Dimensions: 94 x 94 mm

FP - Beech Wood/Pearl JP - Cherry Tree /Pearl MS - Mahogany/Gray NA - Walnut Tree/Aluminium

PETRA

Selection of natural materials. Warm shades of wood with their varying structures create a room full of happiness and sincere comfort.

Dimensions: 94 x 94 mm

GG - Granite/Ice GP - Granite/Pearl GA - Granite/Aluminium GS - Granite/Gray

The MEC21 Series Mechanisms for the LOGUS⁹⁰ Design Series are made of a special alloy of non-combustible plastics that, due to their strength and elasticity, prevent destruction or damage to the body. The plastic design of the mechanism also ensures secure isolation from the conductive parts of the installation.

The mounting frame is an integral part of the device. The whole device is compact, lightweight and allows for easy and quick assembly without the use of tools.

With the "smart clips" on the front of the device, the frame and cover can be easily snapped on and off. It can be easily and quickly changed and adapted to the current colours of the walls of your interior.

10A - 250V~ - Screwless connection

16A / 20A - 250V~ - Connection with screw terminals

Quick Clips allow installation to adjust the frame on an uneven wall (two positions for the "snap" frame). Inequality walls will allow the deal and Floating Fingerboard.

Ability to test electrical functionality of your device without disassembly.

Shaped edge of the body mechanism to align the mounting multiple devices.

Depth 20 mm only allows mounting to instrumentation device / box.

Screwless terminals provide fast and quality connection without need of instrument usage. Double terminals on every pole provide multiple connection without need of extra terminals usage.

Ability to test electrical functionality of your device without disassembly.

Order example

MECHANISM MEC21

oder code: 21 ...
 e.g.:
 21011 = Single Pole Switch
 21111 = Earth Socket

FRAME

oder code: 909 ... T x x
 e.g.:
 90910 TBR = Single Frame, plastic/white
 90930 TCS = Triple Frame, cristal/gray

ROCKER / COVER PLATE

oder code: 90 ... T x x
 e.g.:
 90601 TBR = kRocker for Switches, white
 90652 TAL = Safety Cover Plate for Earth Socke, aluminium

COMPLETE PRODUCT

oder code: ...
 e.g.:
 21011, 90910 TBR, 90601 TBR
 Mechanism, Frame, Rocker /
 Cover Plate

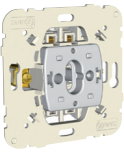

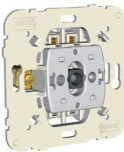

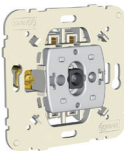

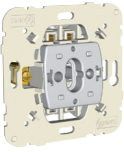

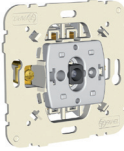

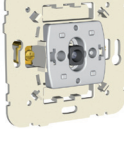

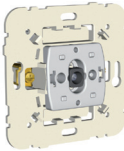

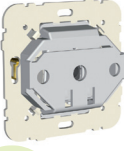

The entire design series are available from 1 frame up to 4 frames.

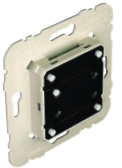

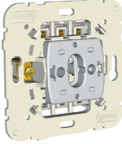

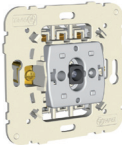

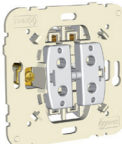

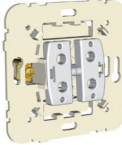

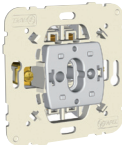

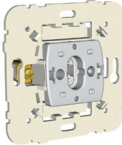

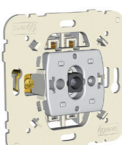

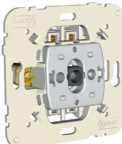

The BASE and AQUARELLA series are available from 1 frame up to 5 frames.

Horizontal or vertical position of the frame is possible thanks to their symmetrical shape.

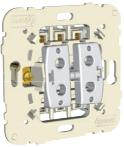

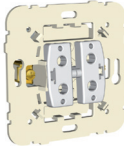

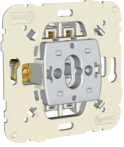

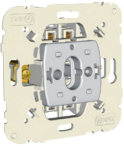

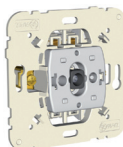

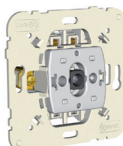

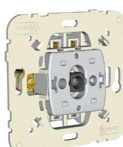

Device covers in red, orange, green for hospital environments.

90403 T BR MF GE PE AL IS PM DU 1

Temperature Control

Rockers / Cover plates

Rotary Thermostat
 - Power: 100-240 V~ - 50/60 Hz;
 - Maximum load: 16 A (3680W, cosφ =1);
 - Compatible with any kind of load
 - Systems Control: Heating and/or Cooling;
 - Temperature settings: 5°C to 30°C;
 - Possibility of connecting the TC-03

21234 1

Cover Plate for Rotary Thermostat

90746 T BR MF GE PE AL IS PM DU 1

Programmable Chronothermostat
 - Rated voltage: 230 V~ - 50 Hz.
 - Breaking capacity: 16 A.
 - Inverter contact (NO+NC), voltage free.
 - Range of temperature readings: -9°C to 35°C.
 - Optimized for electric or heating.
 - Possibility of connecting the Floor Temperature Sensor (Ref. 81950), with automatic self detection.
 Replace for 21230

21235 1

Cover Plate for Programmable Chronothermostat

90748 T BR MF GE PE AL IS PM DU 1

Thermostat with Infrared Remote Control
 - Rated voltage: 230 V~ - 50 Hz.
 - Breaking capacity: 16 A.
 - Inverter contact (NO+NC), voltage free.
 - Range of temperature readings: -9°C to 35°C.
 - Optimized for electric or heating.
 Replace for 21231

21236 1

Cover Plate for Thermostat with Infrared Remote Control

90749 T BR MF GE PE AL IS PM DU 1

Thermo sensor TC-3 for a simple programmable thermostat with infrared control
 - Length: 3 m
 - Range: 0 to 70 °C
 - IP67

TC-3 1

Speed Controller

Rockers / Cover plates

Speed Controller for Induction Motors - 600 VA
 - 25 - 600 VA.

Motion detector (NO+NC)

Motion Detector - 1000W (Order code 21401/45401 S)
Motion Detector - 400W (Order code 21402/45402 S)

Controls the connection of electrical circuits according to the detection of motion and surrounding luminosity.
 Compatible with any electrical load.
 Wall mounting.

Technical parameters	Order code 21401/45401 S	Order code 21402/45402 S
Voltage range:	230 V~ - 50/60 Hz	
Consumption:	1 W	
Max. Light load:	1000 W	400 W
Sensitivity regulation:	√	
Operating time regulation:	5 sek. to 5 min.	
Range of detection:	8 m	
Detection angle:	160°	
Outputs:	NO / NC	

NB: NO - normally open; NC - normally closed.

• Operatin

1. Remove the cover of the mechanism to reach the adjustments potentiometers.
2. Proceed to make the necessary adjustments.

• Connection

Operating Time Regulation

Sensibility Regulation

Dimmer

Electronic Dimmer/Two-way Switch - 320W R, C (Order code 21212)

Allows to adjust the luminous flux of one or more lamps.

Technical parameters	Order code 21212
Maximum load:	320 W
Minimum load:	5 W
Two-way function	
Switches:	√
Minimum intensity setting:	*
Fuse:	—
Bulbs:	√
Halogen lamps, 230 V ~:	√
Halogen lamps with ferromagnetic transformer:	—
Halogen lamps with electronic transformer:	√

Note: * - automatic setting

• Settings

Turn the potentiometer to adjust the intensity of the lamp or group of luminaires.
 By pressing the button, the switch switches to the two-way dimmer function.
 Check voltage on the bottom edge.
 (Order code 21212)

• Connection

Electronic Dimmer/Two-way Switch

Two-way dimmer

Multi-functional Chronothermostat

Multi-functional Chronothermostat

It allows to control manually or automatically the heating/cooling system in accordance with a daily/weekly programming and with preprogrammed temperatures.
Automatic winter/summer time change.
Possibility of programming a period of inactivity (holidays).

Technical parameters	21235
Power:	100-240V~, 50/60 Hz
Maximum load:	16A cos ϕ = 1
Backlight consumption ON:	<350 mW
Backlight consumption OFF:	<100 mW
Temperature reading range:	-9 °C to 35°C
Temp. monitoring accuracy:	0.5 °C
Operating Temperature:	-10 to 45°C

• Characteristics

- Control systems: Heating and/or Cooling.
- Possibility of connecting to the External Sensor.
- Temperature reading: Internal Sensor or External Sensor or both.
- Possibility of maximum of 7 periods/programs per day.
- Key lock.

Multi-functional Thermostat

Multi-functional Thermostat

Allows to control the heating or cooling system in accordance with the required temperature.
Possibility of connecting the Floor Temperature Sensor, with automatic self detection.
Possibility to be controlled by the Infrared Remote Control Transmitter.

Technical parameters	21236
Power:	100-240V~, 50/60 Hz
Maximum load:	16A cos ϕ = 1
Backlight consumption ON:	<350 mW
Backlight consumption OFF:	<100 mW
Temperature reading range:	-9 °C .. 35°C
Temp. monitoring accuracy:	0.5 °C
Operating Temperature:	-10 .. 45°C

• Characteristics

- Control systems: Heating and/or Cooling.
- Possibility of connecting to the External Sensor.
- Temperature reading: Internal Sensor or External Sensor or both.
- Can be remotely controlled via an IR transmitter.
- Timer up to 6h.
- Key lock.

Electrical Blinds Control

**Automatic Relay for Blinds Control (Order code 81512)**

Allows to control the individual and general control of a set of blinds.

Can be installed into a standard wall box, in the derivation boxes near the blinds or in deep wall boxes and behind the wiring devices installed in the same box.

Technical parameters	Order code 81512
Voltage range:	230 V / 50 Hz
Consumption:	1 W
Load capacity:	6 A (1380 W, $\cos \varphi=1$)
Opening and closing time:	90 s
Electrical blockage:	√
Dimensions (H x W x D):	48 x 36.3 x 24 mm

• Wiring Diagram

Blinds Centralized Installation - with Automatic relays for blinds control (Ref. 81512)

P1, P2 – blinds

G (21156) - main module

C1, C2.. (21156) - local module

Note: The protection against two simultaneous orders of open or close applied in the same device or different devices, is guaranteed by the software of the relay.

• Automatic Relay for Blinds Control (Ref. 81512)

Terminal

- ▼ Output for motor - Down

Electrical Blinds Control

Relay for Blinds Control (Order code 81511)

Allows the individual and general control of a set of blinds.

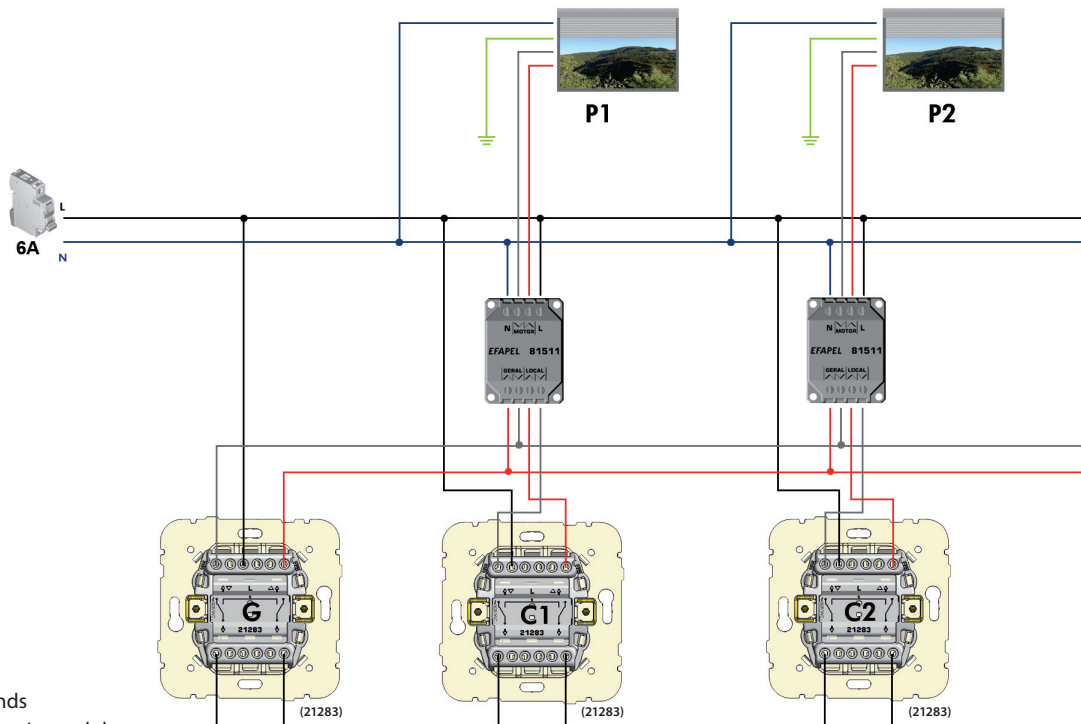

Can be installed into a standard wall box, in the derivation boxes near the blinds or in deep wall boxes and behind the wiring devices installed in the same box.

Technical parameters	Order code 81511
Voltage range:	230 V / 50 Hz
Consumption:	1 W
Load capacity:	6 A (1380 W, cos φ = 1)
Opening and closing time:	90 s
Electrical blockage:	x*
Dimensions (H x W x D):	48 x 36.3 x 24 mm

* Electrical blockage: with the Relay for Blinds Control, the electrical blockage (protection against two simultaneous orders) is guaranteed by the association of the Relay for Blinds Control with the Venetian Double Push-button for Multiple Points Blinds Control (Ref. 21283 / 45283 S).

• Wiring Diagram

Blinds Centralized Installation - with RELAYS for BLINDS CONTROL (Ref. 81511)

P1, P2 – blinds
 G (21283) - main module
 C1, C2.. (21283) - local module

Notes: The protection against two simultaneous opening and close orders in the same device or different devices is guaranteed by the combination of the mechanism (Ref. 21283 / 45283 S) and the relay (Ref. 81511). For this reason, this relay works only with the mentioned mechanism.

• Functions (Order code 81511)

Terminal

WATERPROOF 48

series

EFAPEL with the series **Waterproof 48** is the right choice for "any terrain" when performing an electrical installation in a moist or dusty environment.

Thanks to IP65 protection and use of thermoplastic with high resistance to weather conditions, the **Waterproof 48** series represents the best solution for installations in industrial areas, garages and gardens.

It is produced in the traditional color gray – RAL 7035 – and in white – RAL 9003, which are colors used in EFAPEL technical cable trunkings.

The series **Waterproof 48** has 34 functions; these can be mounted in simple or double bases and in vertical or horizontal positions.

LARA... player in the switch

Radio / Music / Intercom / Videophone / Audiozone

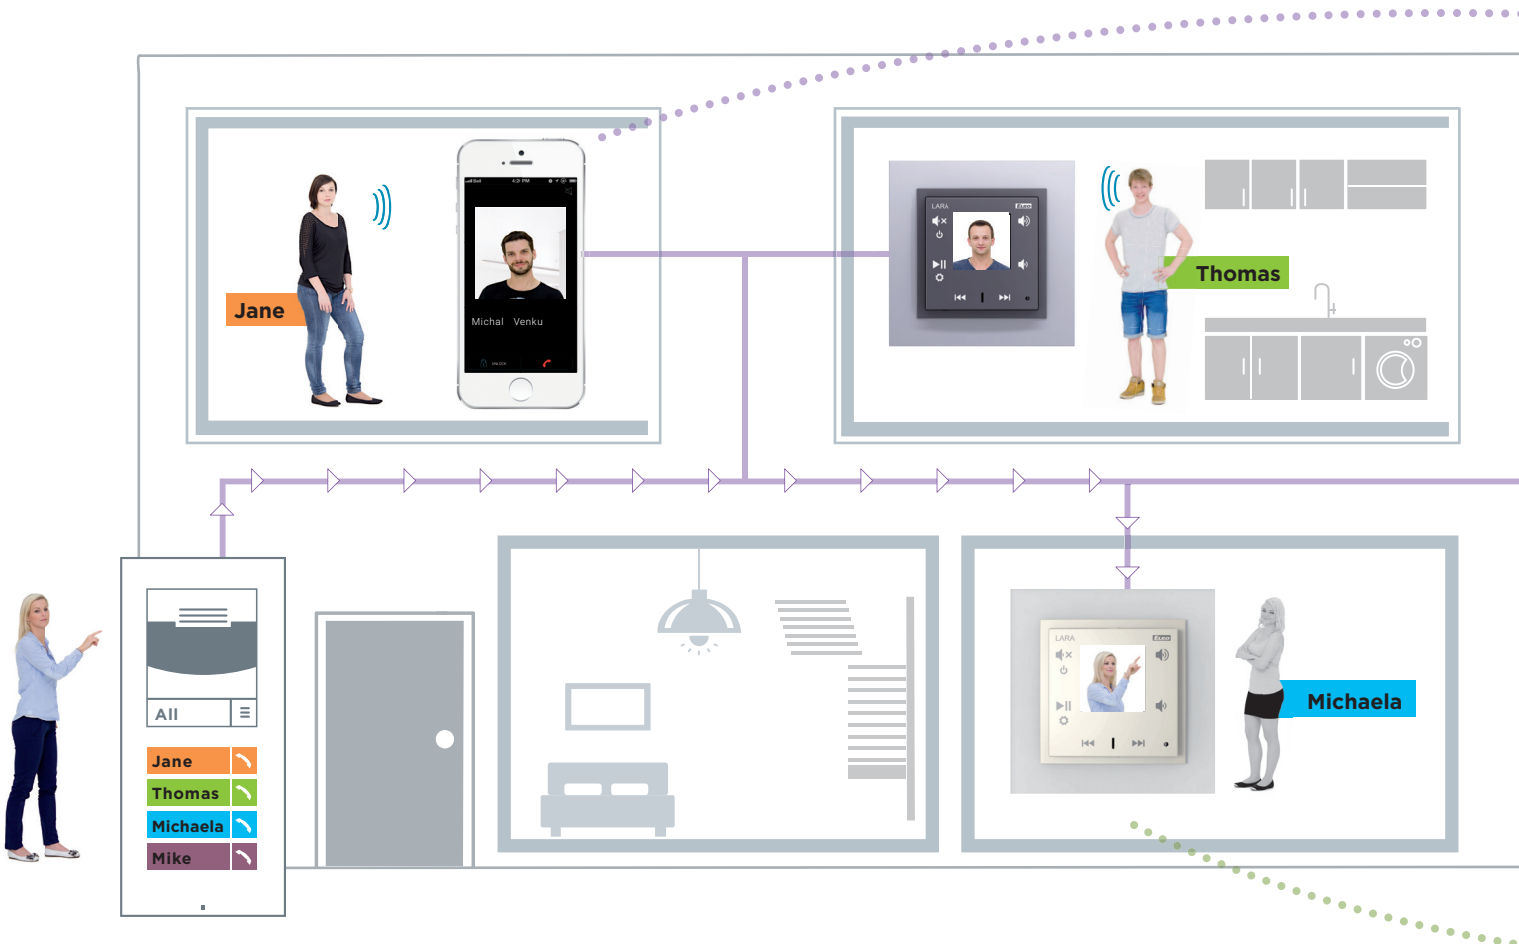

LARA Radio

- LARA Radio is a music and internet radio player - the size of a circuit breaker, in the LOGUS⁹⁰ design (metal, wood, metal ...).
- LARA is used for example in the kitchen, bathrooms, waiting rooms, offices, receptions, entrance halls, operating rooms or wellness areas.
- LARA can play a radio stream and can store as many as 40 in connection with the internet. However, these can be selected from thousands of stations around the world that provide the correct connection data.
- LARA Radio can play the content of an external music source, for example, such as an iPhone, a smart phone, or an MP3 player. These devices are plugged into a 3.5 mm stereo audio jack input that is located at the bottom of the front panel.
- LARA Radio also plays audio files from the central data repository in which the Logitech Media Server is installed. When using with NAS, LARA NAS App is available.
- Operation is done by touching the front panel or infrared remote (included with the product package).
- LARA Radio is equipped with a 1.5" OLED colour display (basic music playback information, setup menu orientation, etc.).
- LARA Radio has an integrated 2x10W amplifier, making it very easy to install the device in areas where the power is sufficient.
- LARA Radio is powered by PoE with a maximum voltage level of 27 V DC / 1000 mA. The advantage is one cable (UTP) for power and communication.

Intercom & Videophone

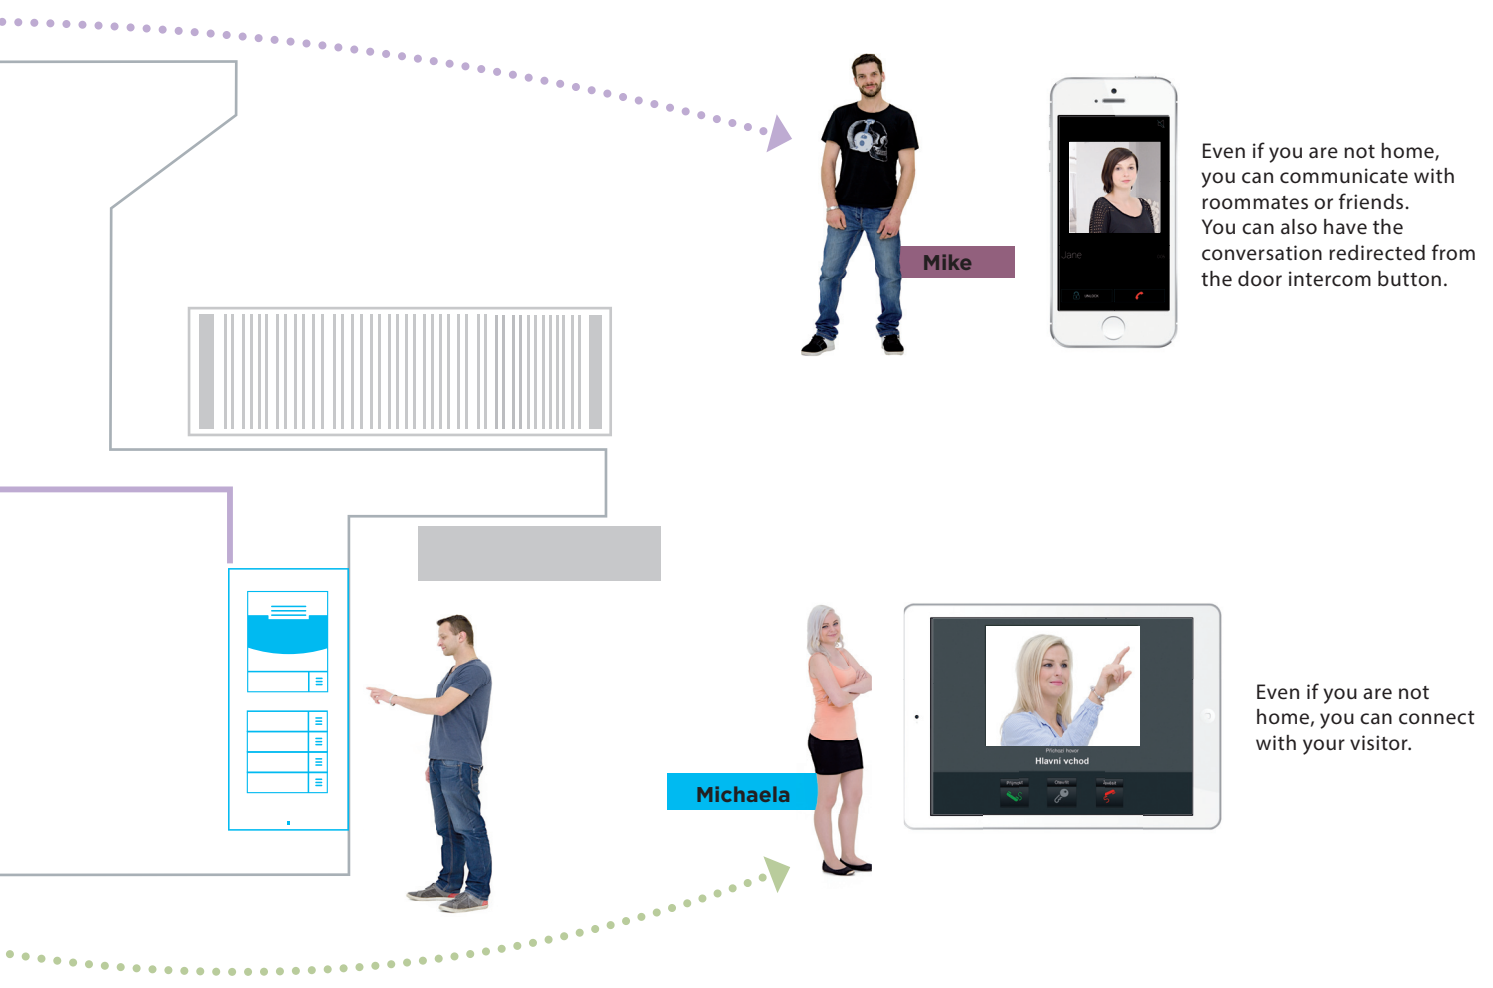

LARA allows you to communicate across the house (Intercom) as well as the door-to-door with the door phone (Videophone).

Up to 30 devices (LARA, phone, tablet ...) can be connected to the system. LARA can communicate with you outside of the house - all you need is an internet connection.

LARA Intercom

- Not only is LARA your radio and music player, but it is also an INTERCOM, VIDEOTELEPHONE and /or AUDIOZONE.
- LARA Intercom is suitable for installation in both residential and commercial buildings.
- INTERCOM allows bidirectional communication between people in the house, up to 8 LARA devices can communicate directly between them.
- In the case of a 2N IP installation (which has an integrated Asterisk disk), Intercom can be used not only between LARA devices but also among smartphones (with iHC-MA, iHC-MI installed).
- VIDEOTELEPHONE allows you to communicate with 2N and ALPHATECH TECHNOLOGIES (IP BOLD) IP from which LARA transmits picture and sound. If you are not at home, the call is automatically redirected to your smartphone.
- You can connect 6 LARA + 2 IP Phones (or combine them with up to 8 accounts in different ways). Once you have connected a "Connection server," you can use up to 30 LARA devices (combined with IP-speakers) in the installation, which is especially suitable for larger installations (buildings, apartment buildings).
- AUDIOZONE, which allows you to play your music in any area in the house.
- LARA Intercom also plays back audio files from the central data repository in which the Logitech Media Server is installed. This feature of LARA can be used within a comprehensive iNELS system or as a device completely independent of house automation. When used within iNELS, the control is part of a comprehensive iHC application. When using with NAS, LARA NAS App is available.

Installation

Flush mounting

The LARA device can be installed in an installation box (along with switches), in a design from one to five frames. This installation is recommended in places where at least one installation box is installed or in a place with hollow walls.

Surface mounting

Surface mounting enables installing the LARA device in places where structural modifications are impossible or difficult to perform. The box is designed for one frame only with selection of installations of external speakers mounted on walls or ceiling.

Power supply

Power supply PoE + Wi-Fi into a box

Wi-Fi bridge with PoE and power supply into an installation box.
Power supply 230V.
order number: 5224

Power supply PoE into a box

PoE injector with power supply intended for an installation box.

Accessories

AUX CABLE LARA (LARA CINCH CABLE) 5208
 Used to connect LARA with exter. amplifier. Reduction 4pin from LARA LINE OUT to 2x CINCH plug into amplifier, length 2x20 cm.

LARA PoE POWER ADAPTER 6191
 PoE power for one LARA.

LARA SPEAKER CABLE 5209
 Patch cable LARA - speaker.

WIFI BRIDGE 5210
 Used for LARA wireless connection via WiFi network.

AUX CABLE LARA (LARA AUDIO CABLE) 6704
 Used to connect LARA with external music source (smartphone, mp3 player). Length 20cm terminated with 2x stereo jack 3.5mm.

POWER SUPPLY (PSB-10-24) 4378
 Switching stabilized power supplies with fixed output voltage, intended for mounting into an installation box (e.g. KU-68). PSB-10-24 - stabilized power supply 24V/10 W.

PoE SWITCH 6605
 Provides LAN connectivity and PoE power supply for up to 5 x LARA. Power supply AC 230 V.

NAS EXTERNAL STORAGE 7212
 Two-chamber NAS server with the function of hosting, sharing and data security.

- The wireless controller is used to control switches and dimmers (lights, gate, garage door, blinds, etc.).
- **RFWB-20/G**: two buttons enable control of two units independently.
- **RFWB-40/G**: four buttons enable control of four units independently.
- The flat design with level base makes it ideal for fast installation on any surface (fixation with adhesive or screws in the installation box).
- When pressing the button, it sends a set signal (ON/OFF, dimming, time switching OFF / ON, blinds up/down).
- Sending a command is indicated by a red LED.
- In LOGUS⁹⁰ switch frame design (plastic, glass, wood, metal, stone).
- Option of setting light scenes, where with a single press, you can control units of iNELS RF Control.
- Battery power supply (3 V / CR2032 - included in the supply) with battery life of around 5 years based on frequency of use.
- Range up to 200 m (in open space), if the signal is insufficient between the controller and unit, use the signal repeater RFRP-20 or protocol component RFIO² that support this feature.
- Communication frequency with bidirectional protocol iNELS RF Control.

- The wireless controller in design LOGUS⁹⁰ measures the room temperature by internal sensor, and based on the set temperature, it sends a command for heating / cooling.
- Option of setting a daily/weekly automatic control program.
- The temperature controller can be used in one of two ways:
 - For controlling an additional heat source (heater, oil radiator, radiant panel) with multi-function switching units RFSA-6x, RFUS-61 or RFSC-61.
 - For control of floor heating, when the internal sensor scans the room temperature, and based on the value, controls the heating unit RFSTI-11B, which monitors the critical floor value by external sensor.
- Manual control by buttons on the unit.
- Range of measured temperature 0-55 °C.
- The backlit LCD display displays the current and set temperature, status (ON/OFF), battery status, day of the week, current time, etc.
- Battery power (1.5 V / 2x AAA - included in supply) with battery life of around 1 year based on frequency of use.
- The flat rear side of the device enables its placement anywhere in the room where you wish to measure temperature.
- Range up to 100 m (in open space), if the signal is insufficient between the controller and unit, use the signal repeater RFRP-20 or protocol component RFIO² that support this feature.
- Communication frequency with bidirectional protocol iNELS RF Control.
- Color combination of temperature unit in design of frames LOGUS⁹⁰ (plastic, glass, wood, metal, stone).
